## 4. COMPONENTS OF PRICING FOR ALL LOANS

The components of pricing and their delineation are as follows –

### A. Cost of Funds:

CIFCPL borrows funds through various means encompassing term loans, debentures, CPs, subordinated debt, external commercial borrowings, etc. The Cost of Funds shall denote the Expected Borrowing Cost\*\*.

**\*\* Expected Borrowing Cost shall include all costs & expenses borne by the Company in relation to borrowing or arrangement of debt, including interest, coupon, upfront fees, legal & other charges, stamping and documentation charges, arranger fees, listing expenses, brokerage/advisory/intermediation charges, hedging costs, commissions, liquidity management**

premium, prepayment or foreclosure charges incurred to replace high-cost debts, penal charges, taxes, etc.

**B. Operational Cost:**

It pertains to costs related to end-to-end loan cycle, including underwriting & collections, operations, employees, fixed assets & infrastructure, technology, management & administration, sales, marketing & promotions, compliance costs, among other things.

**C. Risk Premium:**

It covers all the risks which the Company is exposed to, including but not limited to- credit risk, operational risk, systemic risks. The Company will cover its risks through a combination of loss provisions, insurance.

**D. Margin:**

It covers the expected pre-tax Return on Assets and Net Surplus. Expected ROA is derived from Return on Equity (in proportion of projected DER) as agreed with the equity investor or priced through any capital pricing model.

**Illustrative Example –**

Component	Price
Cost of Funds	8.0%
Operational Cost	9.0%
Risk Premium	3.0%
Margin	6.0%
<b>EIR</b>	<b>26.0%</b>

**Note:** The EIR is inclusive of interest rate and all upfront fees & charges applicable to the borrower.

## 5. SPREAD APPLICABLE FOR MICROFINANCE LOANS

The range of spread of each component for microfinance loans are as follows –

Component	Range	Rationale
Cost of Funds	8%-13%	It is the expected borrowing costs with an expected sensitivity linked to market movement.
Operational Cost	5.5%-9.5%	It is the projected operational costs with an expected sensitivity based upon cost overruns.
Risk Premium	0%-5%	It is the historical trend of loan loss and operational risk observed by the Company
Margin	3%-7%	It is based on pre-tax expected ROA and net surplus.

**Note:** The ranges mentioned here is based on current prevalent rates. If at any point there is a near-breach event i.e. (+) 0.5% or (-) 0.5%, Management will take suitable action to rectify the position, or otherwise bring it to the notice of the Board for its review and direction.
